SuperKIDS SmartTEENS

Learn Directly From The Guinness World Record Holder In Super-Memory And Best Rated Author - Dr. MD Ahmed

When you take the right action daily, massive and true success comes in life. In other words, what you do daily will determine your life results.

You must learn and practice the right daily habits to achieve your goals and live your dream.
In his courses, Dr. MD Sir provides the strategies and daily action steps for all the departments of life: Personal relationships, academics, emotional balance, entrepreneurship/business, career, and health.

Unlike other training programs, his well-researched content focuses on what works and gives you strategies that can be implemented immediately. So, instead of wasting your time and resources on over-hyped things, you can start producing results from day one.

Here's the POWERFUL thing you need to understand about the SuperKIDS SmartTEENS program-

When You Learn From The Best, You Will Achieve the Best!

In the SuperKIDS SmartTEENS (Basic Level), you will learn a unique system of learning based on neuroscience, accelerated learning, and self-development strategies.
You will also learn how to activate the hidden potential within yourself.

- **Join the hundreds and thousands of students who have already enrolled in my courses.**
- **We have a system that guarantees results if you are committed to your development.**
- **This course is seriously massive! You'll learn from more than 15 modules and 20+ hours of solid and usable content.**

"Bengaluru Man Bags Guinness World Record For Super-Memory."

TIMES OF INDIA

Module 1: Smart Study System

After you rapidly read this 7-step system, it allows you to study 4 hours of material in 45 minutes. It's a game changer designed to send your learning to long-term memory. Students have reported accelerated study growth and claimed 100% retention and recall during tests!
This is your golden ticket to academic success.

"Because of MD sir's Smart Study System I was able to score 87% in ICSE 10th board Exams."
- Joel Kiran, St. Johns High School, Bangalore.

Module 2: How To Handle Criticism & Negativity

No matter how talented or serious you are about achieving success in life. If you are surrounded by criticism and negativity, your performance suffers, which can lead to failure. I'd like you to please learn the 2 step process to handle criticism and negativity around you.

Module 3: How To Study Boring & Difficult Subjects

It is said that ideas can change our life. Wrong ideas change our life for the bad, and the right ideas give us the power to move ahead and realize our dreams. Ideas can change our behaviors. Most of us experience boredom and do NOT do the things necessary for us, which takes us away from our goals. Learn the TWO POWER IDEAS that will teach you to handle boredom in the most effective ways. This session will teach you the psychological reason why we get bored doing important things and *how to study boring subjects*. This session can also be used for personal activities like exercising regularly.

Module 4: Dynamic Listening In The Class.

This 3 part system has been created to give you the edge that most students need. You'll learn how to prepare your brain to be more receptive in the class, and then you'll be taught how to gauge the teacher to understand their sensory teaching style and how to use this to adapt yourself to the teacher's style to learn better and more. You'll also know the 3 step process called LiPS to comprehend better the material taught in class. Finally, you'll be taught what to do immediately after you return home, so the information gets stored firmly inside your brain.

Module 5: How To Memorize Formulae, Equations & Derivatives

Learn a new and effective way to make flashcards to memorize formulas, equations, definitions, and derivatives.

Module 6: Traffic Signal Method To Study Like A PRO

This method helps you clarify your exam performance and how to get on the journey of mastering your subjects and achieving the desire to become a rank holder.

Module 7: How To Make Creative Notes

Learn how colors and images activate both sides of the brain to learn like a genius. This skill shows you ways to store information in long-term memory while enjoying your studies.

FOX 40 NEWS

Module 8: Variety Method

Learn when to study different subjects so that you don't stress the brain and maintain balance to study for long hours.

Module 9: What To Do Before, While & After Studying

When you are studying at home, this module teaches you how to prepare your mind to absorb the material to store it in the long term memory. Once you have prepared your mind, you go to the next part that teaches you what action steps have to be taken while studying the material. And the third part will teach you what you must do immediately after studying. These 3 parts are very critical for you to understand, store and recall the answers in the exam.

Module 10: Body Memory To Learn Keywords In Seconds

Think of having the ability to memorize keywords from your answers by just looking at them. You need not write or repeat them out loud; you will only look at the words and use the visual memorization technique to learn them and have a 100% recall.

Module 11: How To Study In Spite Of Disturbances

This part of the workshop covers a 4 step process that teaches you to handle disturbances in your environment and bring focus to your studies.

Module 12: Perfume Memory

Fragrances and odors are strongly associated with memories. You can learn how to use this to have better recall during the exams.

Module 13: How To Learn Difficult Words & History Dates

Sometimes biological and chemical names can give a headache! Learn a brilliant creative technique to learn and memorize tricky words.

Module 14: Strategic Time Out To Lock In & Recall The Material In The Right Time

Your mind can focus only for a certain period, and if you keep studying without knowing when to take a break, your hard work will not yield results in exams. Learn how long your mind can focus on the subjects that matter and what you should do when the focus goes down. This is a study system to mind-lock the answers you have studied and easily recall the same in the exams.

"I used the strategic time-out method to beat the topper in my class!"
- Yashas, CMR-NPS, Bangalore.

Module 15: MHM Technique To Learn 1&2 Marks Answers

You can get on a fast track to memorize one and two marks answers, including multiple choice questions. This memory technique is so powerful that you can memorize all the one and two marks answers from your textbooks. You can also memorize entire quiz books!

DECCAN HERALD

Module 16: Two 4 Tango - Learn Long Answers In A Single Reading

This 7-step ultra-fast memory technique is designed to help you learn long answers in a single reading! It's used for questions like functions, roles, uses, benefits, advantages/disadvantages, manufacturing process, and features.

"My son, Samarth, has scored 100% marks in physics and chemistry. The principal of his college is SHOCKED!"
- Mr. Balasubramanya, IT Engineer, Bangalore

Module 17: Double Your Reading Speed In 30 Days

Double your reading speed in just 30 DAYS!
Learnt the 4 well researched techniques that, when practiced, will allow you to double your reading speed in just 30 days.
Increase your knowledge bank to ensure long term success. Cut study time by half and still have fun studying. Focus on the important stuff by decluttering the fluff in the books. Become efficient as a student and be faster than your competitor. Get the inside edge by learning speed reading.

Module 18: Special Session On Leadership Parenting

Learn how to plan your child's life and gain insights that can help you become an effective and efficient parent.

Module 19: MMS Technique To Learn Keywords

You'll be taught MMS, the king of memory techniques, in this session! Using this technique, many students have memorized hundreds of words in the proper order and have broken the 2005 world record. You need not do that, but it's undoubtedly good to know that you have the technique if you want to.
Imagine how it would be if you could memorize keywords in the correct order from your paragraphs and chapters in a matter of minutes. MMS can make you memorize hundreds of keywords. This session helps you to create a memory infrastructure inside your mind that enables you to memorize like a machine. You will be able to memorize keywords in the right, reverse, and random order, along with the corresponding number of the keyword, before the class ends. This is a practical technique that gives you on-the-spot results and helps you better recall in exams and break world records in the long run!

Note:
The learning in this course will be immediately applicable as you attend the workshop, consider the following:
How can I use this learning tomorrow at school?
When you apply the knowledge, the time invested will pay dividends.

To Be The Best In The World, Learn From The Best In The World!
